

## Onsite Physiotherapy Services

It is common knowledge amongst employers that the most important asset of any business is the staff. However they can also be your most expensive asset due to the indirect costs associated with a staff member incurring a musculoskeletal injury. Lost time, reduced productivity, medical expenses, increased wages for casual staff to cover the injured worker and time spent training new staff are all consequences of this reality.

### INJURIES COST EMPLOYERS MONEY!

Managing health and safety at work and proactively managing employee health makes good business sense.

### What Onsite services does QOL provide?

QOL Physiotherapy has a range of options to suit your company's needs from providing as little as 5 hours up to 30+ hours per week.

Our scope of service means that our physiotherapists can do much more than just assess and treat your workplace injuries, they can also conduct any of the following workplace health and safety services:

- **Return to work planning and advice**
- **Worksite assessments**
- **Injury prevention programs including onsite exercise programs**
- **Manual Handling Risk assessments**
- **Manual handling training sessions**
- **Office ergonomic assessments and training sessions**
- **Develop and run onsite health and wellness programs**

Essentially we are able to offer services to suit any company's budget and safety requirements.

Contact QOL Physiotherapy on **(08) 9345 0842** to discuss options to organise YOUR onsite physiotherapy services today.

### A healthy pain free employee is far more productive than someone in pain!

" Since bringing QOL Physio onboard to provide physiotherapy services for our company we have seen a reduction in workcover claim numbers and claim costs as well as reduced loss time injuries. Not only that but the management team have noticed an improved feeling of employee morale and productivity. The guys on the floor are now more willing to report injuries to their supervisors as they occur and having QOL on hand to assess and manage these injuries asap means the whole situation is dealt with much more efficiently and recovery times are significantly reduced. I can't recommend QOL physiotherapy more highly - having onsite physio truly is key to a healthy and happy workplace."

- Trevor Fleming (CEO)

## Benefits of Onsite Physiotherapy services

QOL makes onsite physiotherapy a convenient option for your workplace. Onsite physiotherapists can provide immediate assistance to employees who incur a workplace injury.

The recovery process is much faster through the increased ability of the physiotherapist to understand how the injuries are caused and how to reduce the impact of those injuries during rehabilitation through being based onsite.

The specific benefits are clear;

1. **Immediate access to Assessment, diagnosis and treatment of workplace injuries which results in faster recovery times and therefore a reduced incidence of 'lost time injuries'.**
2. **Convenient physiotherapy access for employees means increased reporting rates and prevents "niggles" developing into extensive and chronic injuries**
3. **Decreased absenteeism and time lost in travel for employees as they can be treated at a convenient time whilst at work helping to facilitate the continuation of care where appropriate.**
4. **The ability to observe the worker in their environment helps our physiotherapists to better understand their job role and facilitates their return to full duties and allows us to be better positioned to recommend alternative working practices.**
5. **Creates better communication between all key parties including the injured worker, supervisors and management – ensuring everyone is well informed in regards to the workers functional capacity and the return to work plan.**
6. **Provides the opportunity to track injuries and statistics to identify key risk areas within your business.**
7. **Enhances workplace morale as employees feel that they are being well supported and that their health is in the companies' best interest.**

QOL Physiotherapists are the injury prevention and injury management specialists that will add increased value to your business.
